"__" _____ 2017 г.

Описание задания

Разработать программу, реализующую работу с LINQ to Objects. В качестве примера используйте проект «SimpleLINQ» из примера «Введение в LINQ».

1. Программа должна быть разработана в виде консольного приложения на языке C#.
2. Создайте класс «Сотрудник», содержащий поля:
 - ID записи о сотруднике;
 - Фамилия сотрудника;
 - ID записи об отделе.
3. Создайте класс «Отдел», содержащий поля:
 - ID записи об отделе;
 - Наименование отдела.
4. Предполагая, что «Отдел» и «Сотрудник» связаны соотношением один-ко-многим разработайте следующие запросы:
 - Выведите список всех сотрудников и отделов, отсортированный по отделам.
 - Выведите список всех сотрудников, у которых фамилия начинается с буквы «А».
 - Выведите список всех отделов и количество сотрудников в каждом отделе.
 - Выведите список отделов, в которых у всех сотрудников фамилия начинается с буквы «А».
 - Выведите список отделов, в которых хотя бы у одного сотрудника фамилия начинается с буквы «А».
5. Создайте класс «Сотрудники отдела», содержащий поля:
 - ID записи о сотруднике;
 - ID записи об отделе.
6. Предполагая, что «Отдел» и «Сотрудник» связаны соотношением много-ко-многим с использованием класса «Сотрудники отдела» разработайте следующие запросы:
 - Выведите список всех отделов и список сотрудников в каждом отделе.
 - Выведите список всех отделов и количество сотрудников в каждом отделе.

Диаграмма классов

Результаты выполнения

```
List of all employees and departments, sorted by department:
(id = 4; surname = Adoree; id_department = 17)
(id = 8; surname = Akerman; id_department = 17)
(id = 5; surname = King; id_department = 15)
(id = 3; surname = Warhol; id_department = 13)
(id = 7; surname = Adam; id_department = 13)
(id = 9; surname = Picasso; id_department = 13)
(id = 2; surname = Musk; id_department = 12)
(id = 1; surname = Dior; id_department = 11)
(id = 6; surname = Chanel; id_department = 11)
A list of all employees whose surname starts with the letter 'A':
(id = 7; surname = Adam; id_department = 13)
(id = 4; surname = Adoree; id_department = 17)
(id = 8; surname = Akerman; id_department = 17)
List of all departments and number of employees in each department:
{ v1 = art, v2 = 13, cnt = 3 }
{ v1 = writing, v2 = 15, cnt = 1 }
{ v1 = fashion, v2 = 11, cnt = 2 }
{ v1 = cinema, v2 = 17, cnt = 2 }
{ v1 = technologies, v2 = 12, cnt = 1 }
A list of departments in which all employees start with the letter 'A':
{ v1 = cinema }
List of departments in which at least one employee has a surname beginning with the letter 'A':
{ v1 = art }
{ v1 = cinema }
A list of all departments and a list of employees in each department:
{ id = 11, name = fashion }
{ id = 12, name = technologies }
{ id = 15, name = writing }
{ id = 13, name = art }
{ id = 17, name = cinema }
{ id = 1, surname = Dior }
{ id = 2, surname = Musk }
{ id = 3, surname = Warhol }
{ id = 5, surname = King }
{ id = 6, surname = Chanel }
{ id = 7, surname = Adam }
{ id = 4, surname = Adoree }
{ id = 8, surname = Akerman }
{ id = 9, surname = Picasso }
List of all departments and number of employees in each department:
```
